

Fellsman 2014 Split Times

During the 52nd Fellsman, RFID technology was used to record entrants arriving at checkpoints. Although RFID scanning took place at all checkpoints, not all entrants were recorded at all checkpoints using this method. Manual systems were used to record the remainder.

For the benefit of entrants wishing to analyse their performance, we have published all the available scanned data. Times in this table are shown only where an entrant scanned in using their RFID tag. In other cases, arrivals were recorded manually, so rather than display an inaccurate time the committee has decided not to publish a time. These are marked as "n/a". Finish times are not shown because the recorded time does not take account of waiting time or other adjustments, but the main results page does show official times. Retirements and withdrawals are marked with an "R" and "W" respectively.
